HSX steel high-pressure float regulator for natural refrigerants (ammonia, NH₃, R717 & carbon dioxide, CO₂, R744)

Note: HSX high-pressure float regulators have a welded shut-off valve at the inlet and outlet and a transport lock / manual adjustment operable from the outside. Furthermore, service valves for drainage and for the discharge of non-condensable gases via two G¹/₄" threaded connections as well as a vacuum nozzle can be installed. Depending on the designed throttle orifice, the refrigerant is expanded from the high-pressure to the low-pressure side of the refrigeration plant. The integrated N-ball is suitable for NH₃ and CO₂ applications. The mechanical design operates without electricity / electrical voltage and requires no regular maintenance cycles. When ordering, please state the throttle orifice (-X, -H, -M, -L), the refrigerant and the application (Q^o, t^o, t^o)! Pressure / temperature operating limits:

PS: Max. permissible operating pressure in bar

TS: Permissible operating temperature in °C associated with the permissible operating pressures (PS)

4 Valve stem sealing system

The valve stem sealing system is maintenance-free.

The sealing system consists of the following components:

1. Wiper ring

The wiper ring prevents the ingress of dirt and water from the outside.

2. O-ring A

O-ring A makes the valve vacuum-tight. (Valve operation in the vacuum range at low temperatures)

3. Guide bush

The guide bush prevents damage to the stem.

4. O-ring B

O-ring B seals the outer part of the sealing system in addition to the flat sealing ring SB.

5. Resilient PTFE ring

The resilient PTFE ring is the primary seal of the sealing system. It consists of a high-performance PTFE compound with a wound stainless steel spring. This seal seals the valve to the atmosphere.

6. Flat sealing ring SB

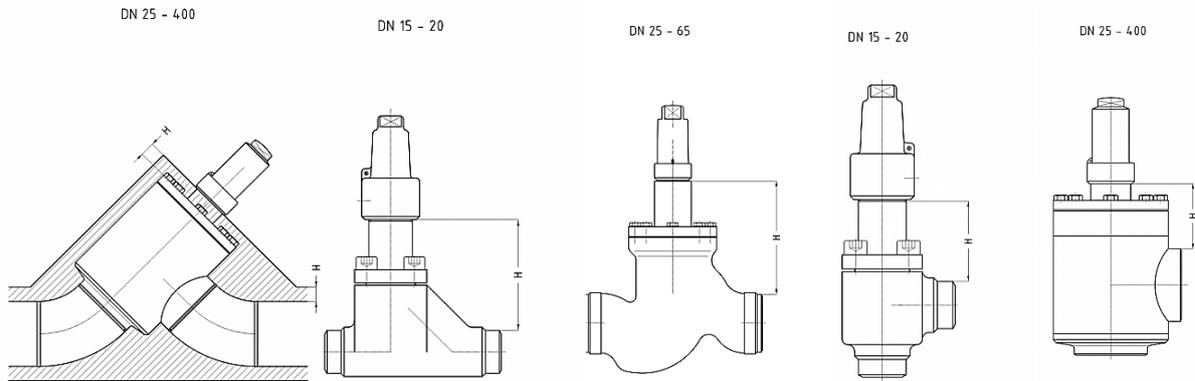

The flat sealing ring SB seals the outer part of the sealing system.

Note: GEA AWP valves have a back seal. Therefore, the removal and replacement of the sealing system is possible during operation of the plant. Please observe the instructions in our operating regulations regarding this.
